

# EvolutionSCADA™

YOU'LL NEVER GET LEFT BEHIND.  
FLEXIBLE PIPELINE MANAGEMENT & CONTROL SYSTEMS

## Evolution Trending™

### Plot Points On The Fly And See Trends Instantly!

Track changes, troubleshoot alarms, and visualize pipeline operations like never before on dynamic graphic displays in this easy, point-and-click trending application from EvolutionSCADA.

Using historical data, real time data, or both, Evolution Trending™ lets you plot up to 16 values in a single trend window for easy comparison. You can trend digital, analog, meter/accumulator, and tank values all on the same timeline.

You can even create trend displays on the fly — simply click on a point to add it to a new or existing trend window and see results instantly.

#### See It Live!

Call 425.821.7618 or email [sales@evolutionscada.com](mailto:sales@evolutionscada.com) to schedule a demonstration today.

#### Make Clear-Cut Decisions.

"We have Trending up 24 hours a day to track density changes through the system and decide when to cut. It's probably the most useful tool we have."

Amos Simoncelli  
Operator/Oil Movements Supervisor  
LOOP

#### Fix Problems Faster.

"You can trend pressures and flows, see immediately how they relate, and determine whether you have a line break, regulator problem, or something else. It's outstanding."

Joe Donovan  
Systems Operator/Computer Admin  
PSE&G
